

STACK OVERFLOW DEVELOPER SURVEY (2019) - Data Analysis

MINTU VIPIN JOY

12 APRIL 2024

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Data Cleaning, EDA
- Current Technology Usage Trend
 - Language
 - Database
 - Platform
 - Web Frame
- Future Technology Usage Trend
 - Language
 - Database
 - Platform
 - Web Frame
- Demographic Survey
 - Gender
 - Country
 - Age
 - Education Level

INTRODUCTION

- DataSet - The 2019 Stack Overflow Developer Survey
 - Responders - 90,000 developers
 - Analysing - Programming Languages, Databases, Platform, Web frame
 - Demographics – Gender, Country, Age, Education level
- Target Audience
 - IT Professionals
 - Anyone interested in IT
 - Students
- Significance of predicting the trend

METHODOLOGY

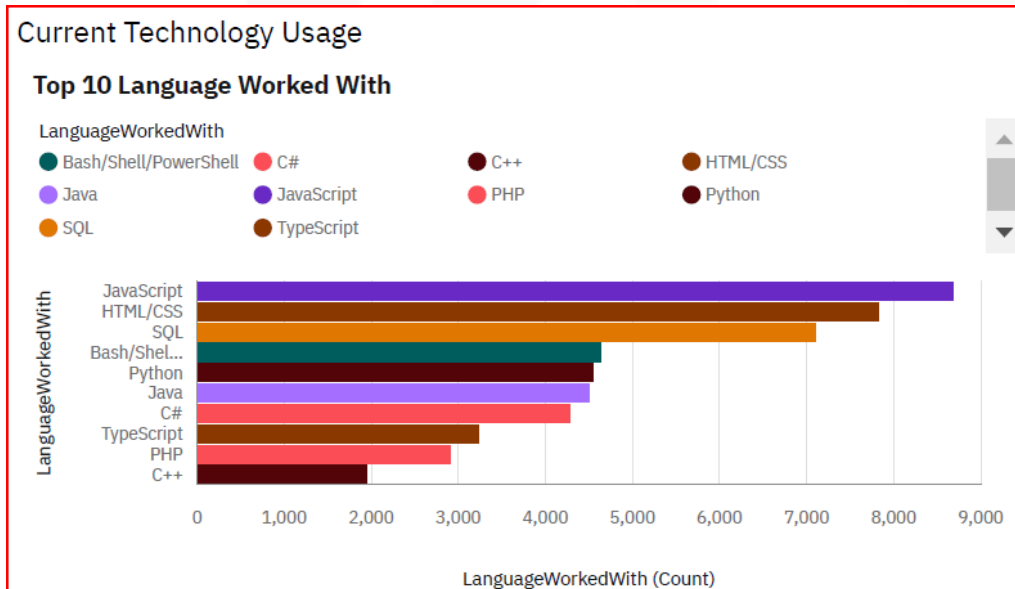

- Collect survey data & explore its content
 - Web Scraping
 - APIs.
 - Request library.
- Data Preprocessing & Exploratory data analysis
 - Python
- Data Visualization
 - Highlight distribution of data, relationships, the composition and
 - comparison of data- python
- Dashboard
 - IBM Cognos Analytics

RESULTS

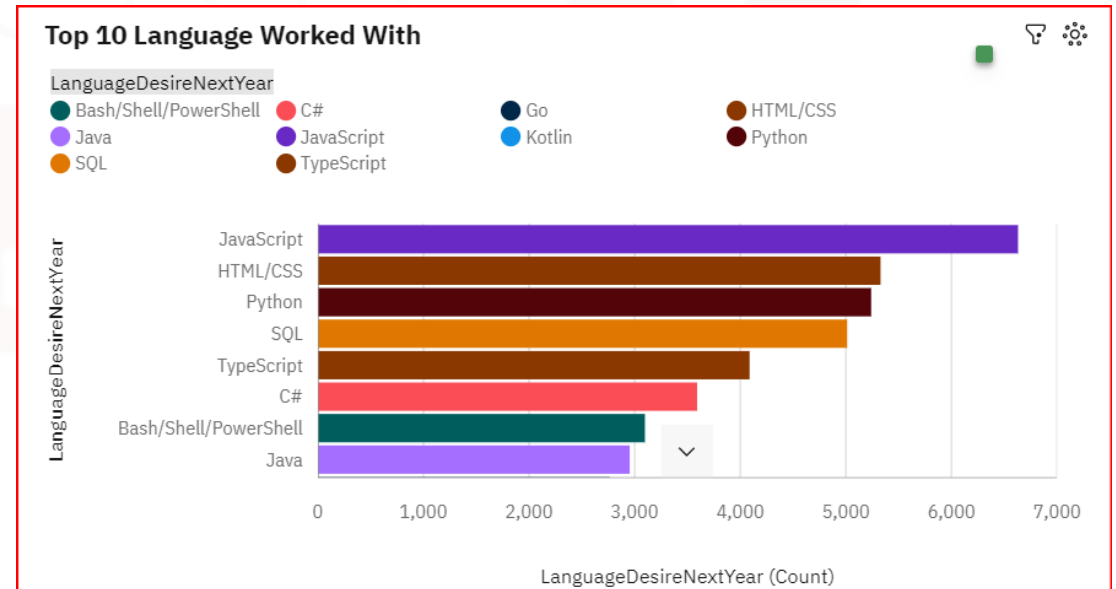

PROGRAMMING LANGUAGE TRENDS

Current Year

Next Year

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

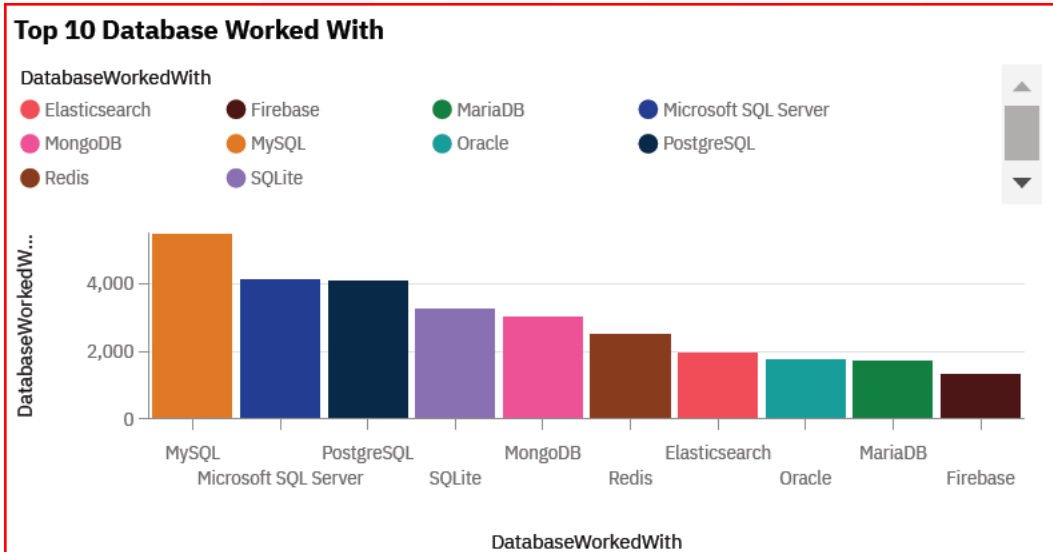

- JavaScript is top trending in the world
- Python is more popular
- HTML/CSS and SQL still has great portion in language usage trend

Implications

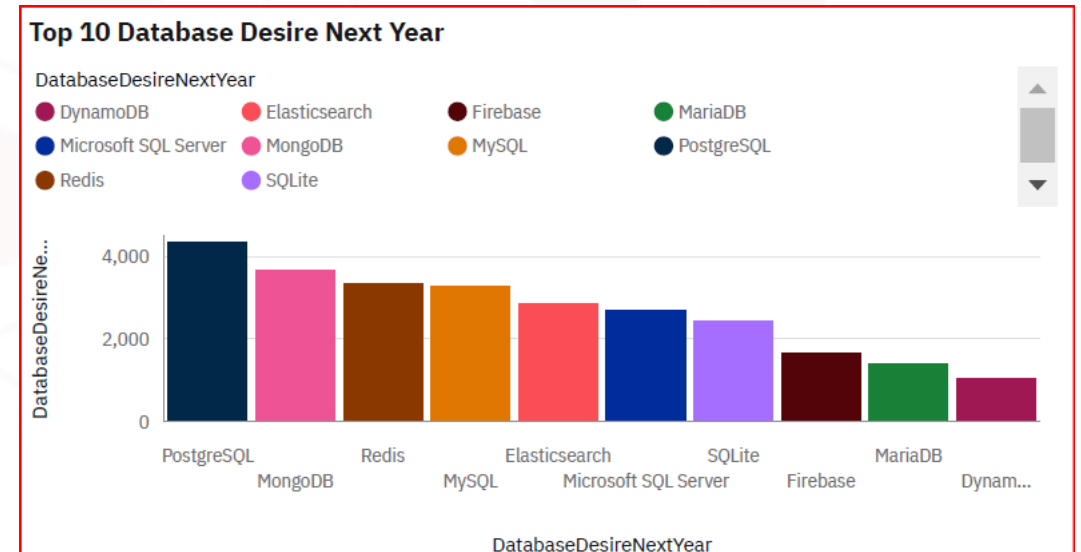

- Web developments and Web developers are still in high demands
- Python is the new trending language, especially popular in AI fields
- JavaScript and TypeScript are crucial to learn for developers

DATABASE TRENDS

Current Year

Next Year

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- MySQL as most used database
- Lack of interest in Microsoft SQL Server and SQLite
- Increasing interest in PostgreSQL and MongoDB

Implications

- Microsoft SQL Server and SQLite losing ground in the market
- PostgreSQL and MongoDB establishment in the market
- Open source databases are preferred

DASHBOARD

[Dashboard](#)

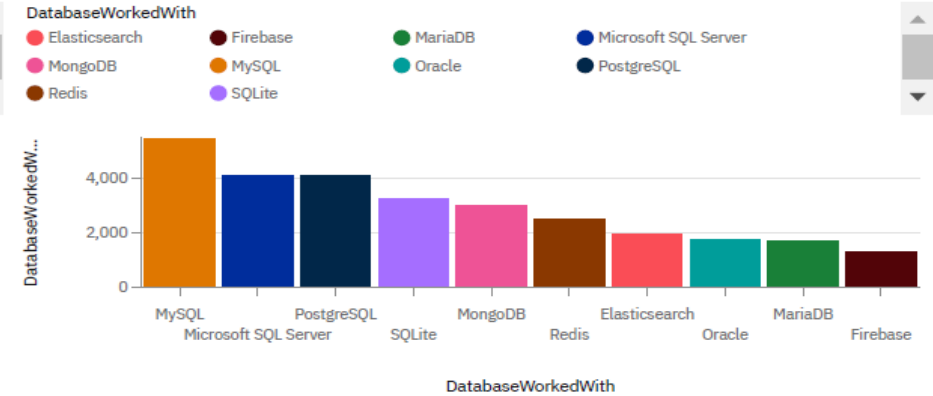

DASHBOARD TAB 1

Current Technology Usage

Top 10 Language Worked With

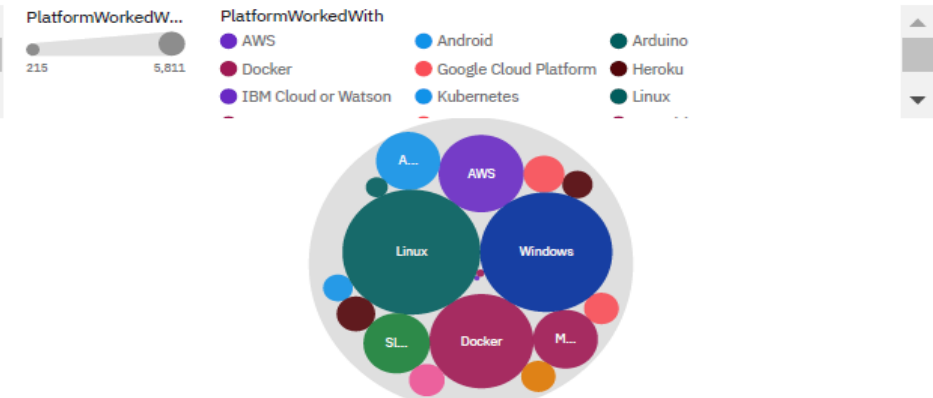

Top 10 Database Worked With

Platform Worked With

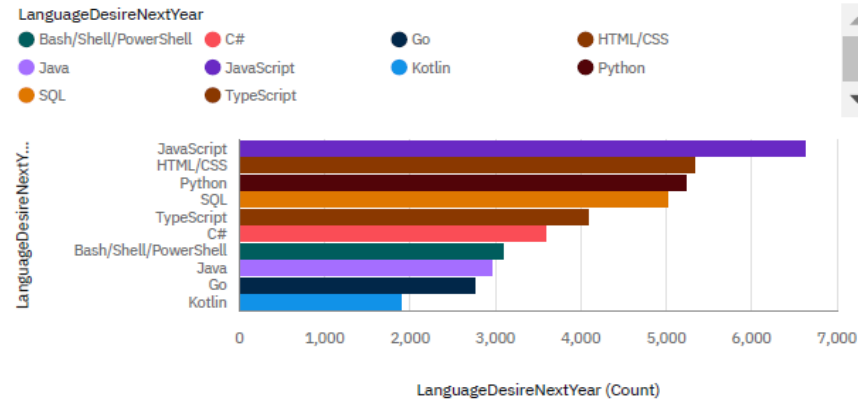

Top 10 Web Frame Worked With

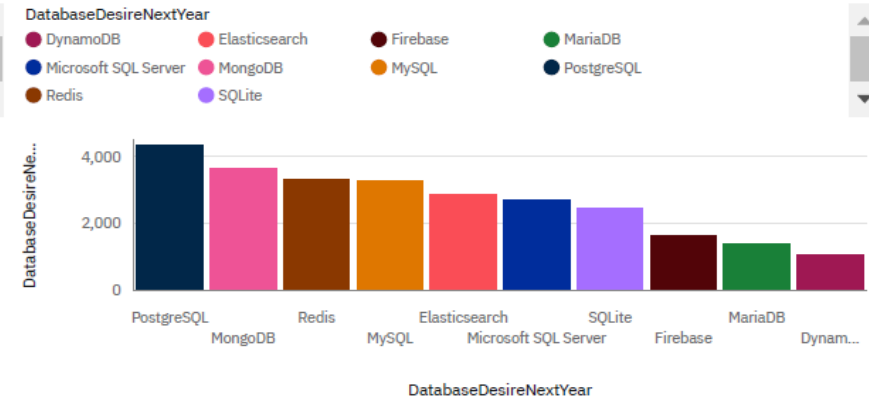

DASHBOARD TAB 2

Future Technology Trend.

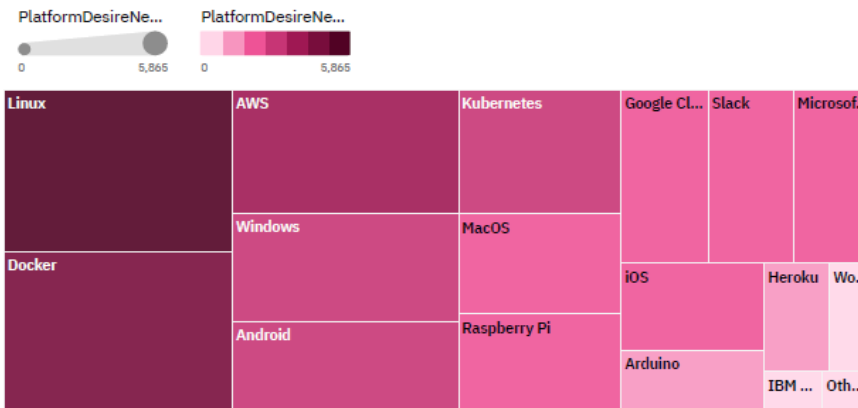

Top 10 Language Worked With

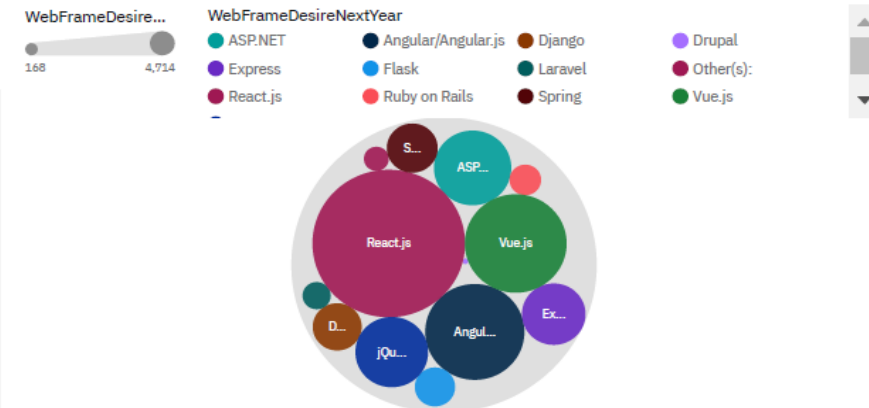

Top 10 Database Desire Next Year

Platform Desire Next Year

Web Frame Desire Next Year

DASHBOARD TAB 3

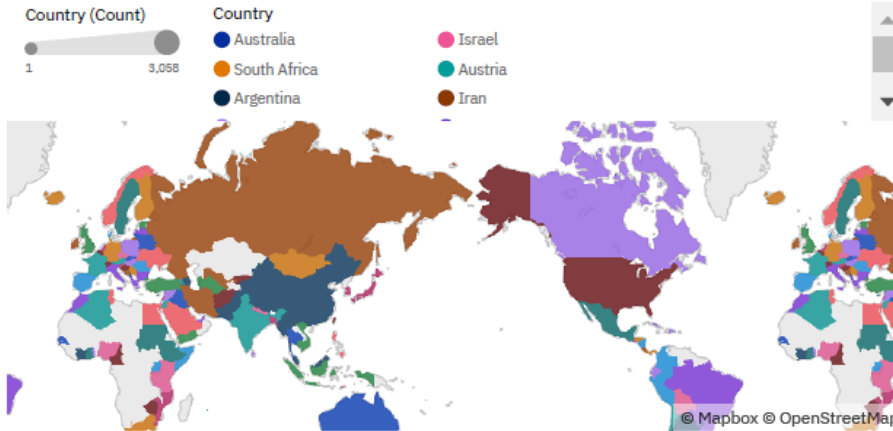

Demographics

Respondent classified by Gender

Gender
Woman Man

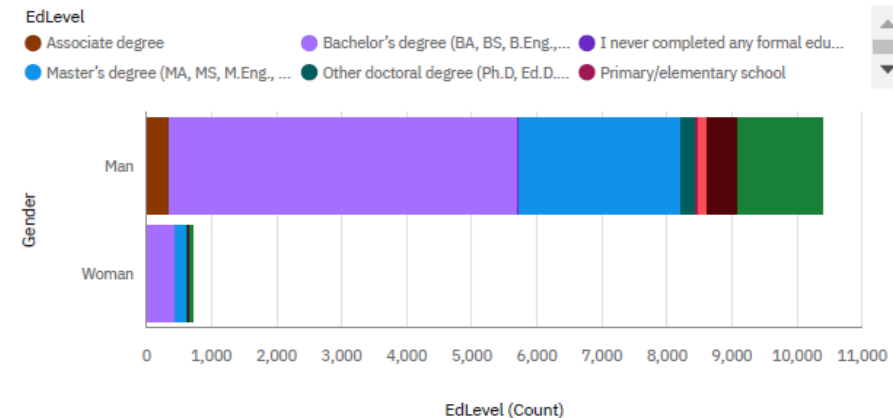

Respondent Count for Countries

Respondent Count by Age

Respondent Count by Gender, classified by Formal Education Level

DISCUSSION

- 
- Current & Future Technology Usage Trend
 - Gender, Age, Country and Education Discrimination in IT Industry

OVERALL FINDINGS & IMPLICATIONS

Findings

- JavaScript widely used and TypeScript getting popular
- Developers mostly located in developed countries
- There are extreme gender and age discrimination

Implications

- JavaScript and TypeScript web frames gaining fans
- Young developers without postgrad studies on its majority
- Gender gap and age gap will affect job hiring

CONCLUSION

- Current & Future Technology Usage Trend
 - Programming Language, Database, Platform and Web frame
- Gender, age, country, and education significantly influence workforce diversity, skills development, and market dynamics in the IT industry

APPENDIX

IBM Cognos Analytics

IBM Cognos Analytics is a comprehensive business intelligence and analytics platform that enables organizations to make data-driven decisions. It offers powerful reporting, dashboarding, and data visualization capabilities to uncover insights from diverse data sources
